10. Could the professor raise your interest in the topic of the lecture?	1,25
11. Did the professor encourage students to participate/discuss?	1
12. Could you follow/ understand the contents of the lecture?	1,25
13. Give a general grade for the course (overall assessment)	1,25

<p>14. What was the best/ most useful for you concerning this course? Giver your personal assessment!</p>	<p>5 answers (out of 8):</p> <p><i>In general, the course itself was very interesting. I liked the last three lecture topics. We enjoyed too much and thanks for everything you did for us!</i></p> <p><i>The most useful was discussions during the lecture, because debate is very productive.</i></p> <p><i>The most important and interesting for me was the role of mayors in other countries.</i></p> <p><i>Discussion about interesting topics, acknowledgement of the experience of European countries and comparison with our experience.</i></p> <p><i>Discussions, where every student had a chance to participate. This gave flexibility to the learning process. Those group projects should be introduced to every lecture.</i></p>
<p>15. Where did you see deficits in this course? What should be changed in the future?</p>	<p>5 answers (out of 8):</p> <p><i>Everything was accessible. We talked too much about privatization, NPM, Democratic legitimacy etc...Did not notice deficit elsewhere; everything fine. You gave us as much information as it was possible during such a little time. Good luck, hopefully, I'll see you again!</i></p> <p><i>Too little time to learn much about the local government system, which was new to me. 5 days were not enough. Thank you very much for interesting lectures!</i></p> <p><i>The course was too short and there was too much left to be known.</i></p> <p><i>More different literature accessibility and more time for discussions.</i></p> <p><i>None whatsoever.</i></p>
